RESUME OF DAVID BOYSEN HOISINGTON

David B. Hoisington was born on 11 February 1920 in Philadelphia, Pennsylvania. In 1940 he received a Bachelor of Science in Electrical Engineering from Massachusetts Institute of Technology. Graduate study followed at the Moore School of Electrical Engineering where he received a Master of Science in 1941. His research was done in the field of multiplex and stereo single-sideband radio transmission under the direction of Professor Knox McIlwain.

Following graduation he was employed by the Hazeltine Electronics Corp., in New York, where he was a development engineer on automatic direction finding and radar IFF equipment. In January 1946 he joined the Sperry Gyroscope Company as project engineer on radar for guided missiles. During 1942 and 1946-47 he also did part-time graduate work at Polytechnic Institute of Brooklyn, and from February 1945 to June 1946 was an electronics instructor in the night school of the College of the City of New York.

In December 1947 he joined the faculty of the Naval Postgraduate School where he is a Professor of Electronics in the Department of Electrical Engineering. On 1 June 1976 he was appointed Chairman of the Electronic Warfare Academic Group.

He has been active in the affairs of the Naval Postgraduate School Faculty, having served on numerous Faculty Committees, and as Faculty Secretary and Faculty Chairman. He initiated the establishment of the Dependents' Scholarship program administered by the Naval Postgraduate School Foundation, Inc., and served as the first Chairman of the Dependents' Scholarship Committee.

His research is primarily in the field of electronic warfare. He is the author of several papers in this area. He is also the author of the text, Nucleonics Fundamentals, McGraw-Hill, 1959. He is a licensed Electrical Engineer in the State of California. He is a Senior member of the Institute of Electrical and Electronics Engineers, a member of the Electronic Warfare Professional Society, the Association of Old Crows, and a member of Sigma Xi.

PUBLICATIONS OF D. B. HOISINGTON

OPEN LITERATURE

Books; published papers, notes, letters.

1. Low Cost Transistorized Code-Practice Oscillator
QST, 38, 24-25 (1954) P
2. Three-Band SSB Exciter Using a Mechanical Filter
QST, 40, (1956) P
3. High Energy Particle Homograph
IRE Trans. Nuclear Science, NS-4 52-53 (1957) P
4. Single Sideband for the Radio Amateur
American Radio Relay League (2d ed.) 1958 IP
5. Nucleonics Fundamentals
McGraw-Hill, 1959. 410 p. B
6. Power Transistor Circuit Design for Maximum Heat Transfer
Proceedings of the National Electronics Conference,
19, 444-447 (1963) IP
7. Double-Tuning Simplifies Superhets
Electronics, 37, 39-41 (1964) P
8. Nucleonics Fundamentals
(Japanese edition) 1964 B
9. Direct Current Regulator Drives Fluorescent Lamps
Electronics, 39, 94-95 (1966) P
10. Proposal for Use of Decimal Measurement of Latitude and Longitude and Support for the Milliday
Electronics, 39, 7 (1966) L
11. Oscillator as Detector
Electronics, 41, 95 (1968) N
12. An Adaptive Filter for Radar Tracking Using Target Maneuver and Jamming Sensors (CONFIDENTIAL)
with H. Titus and others
Fourteenth Annual Tri-Service Radar Symposium
Record, 2, 286-303 (1968) P

Publications of D. B. Hoisington (cont)

13. Deceptive Jamming (U) (SECRET) IP
 with H. A. Titus and W. B. Fletcher
 Fourteenth Annual Joint ECM Planning Conference, FT.
 Monmouth, N. J., 1968
 Proc. 3, 105-115 (1969)
14. Silencing Aluminum Spars P
 Yachting, 62, 83+ (1969)
15. TDR: A Radar within a Radar P
 with W. B. Shoemaker and G. L. Sackman
 IEEE International Microwave Symposium, 1969
 Microwaves, 9(10), 32-36 (1970)
16. Automatic Marine Warning System P
 with J. L. Post
 IEEE Trans. Vehicular Tech., VT-19, 245-248 (1970)
17. Analog Cancellation Filter with Variable Passband for Use in IP
 Time Division Multiplex Systems
 with H. L. Broberg
 Fourth Asilomar Conference on Circuits and Systems, 1971
 Conf. Record, 50-54 (1971)
18. Production of Frequency and Phase Modulated Signals of High IP
 Modulation Index by a Modified Terrodyne Technique
 with L. E. Miles
 Fourth Asilomar Conference on Circuits and Systems, 1971
 Conf. Record, 566-570 (1971)
19. High-Gain Repeater Jammer (U) IP
 with R. T. S. Keith
 Proc., Sixteenth Annual Joint Electronic Warfare Con-
 ference, VI95-VI102
 Naval Missile Center Technical Publication, TP-71-29
 (1971) (SECRET/NO FORN)
20. Automatic Control Speaker Output Compensates for Noisy Back- P
 ground
 with A. F. Hobson
 Electronic, 45(24), 118-121 (1972)
21. Finding Hidden Brass Nails (p. 420) N
In Markus (ED): Electronic Circuits Manual
 McGraw-Hill (1971)
22. Range Gated Moving Target Indicator with Digital Filters IP
 with D. L. Cummings
 Sixth Asilomar Conference on Circuits and Systems,
 Pacific Grove, Calif., Nov. 15-17, 1972
 Conf. Record, 262-266 (1973)

Publications of D. B. Hoisington (cont)

23. Multiple-Target CW FM Radar IP
Sixth Asilomar Conference on Circuits and Systems,
Pacific Grove, Calif., Nov 15-17, 1972
Conf. Record, 280-284 (1973)
24. An Improved Method of Generating Noise with a TWT. IP
18th Annual Joint EMC Planning Conference, Air Force
Academy, March 27, 1973
Proc. (SECRET)
25. Autumn Cruise: Less Fog, Uncrowded Harbors Enhance Journey P
from Monterey to San Diego
SEA, 65(7) 66-68+ (1973)
